

## WELCOME TO OUR TWO NEW STUDENT INTERNS

Hello! My name is Rhonda, and I am honored to be a Student Intern for the SDSRT. I started my career in the medical field as a hospital switch board operator, and soon after moved into the position of clinic receptionist where I was able to get my Limited X-ray license. I received my Associates of Science from Bismarck State College, and am currently attending the Medical Radiography Program through Rapid City Regional Hospital.

I have several hobbies and interests, which are quite diverse. I worked as a florist for many years before getting into the medical field full-time. When the weather is warmer and I have some free time, you will find me out happily working in my flower beds. I enjoy almost any type of arts and crafts, so long as it doesn't involve origami. Before moving to South Dakota, I spent a couple years volunteering at the Pioneer Trails Regional Museum in the Paleontology department, working in the field and lab to prepare dinosaur fossils.

Most importantly, I am the mother to a great 11-year-old son, Damon. We live in Spearfish with my Fiancé, Ryan, and his two kids, Andra (11) and Kale (8). We will be getting married this coming June. Another important member of the family is our cat, Chester.

Thank you so much for choosing me for this amazing opportunity! I look forward to meeting everyone and working for the SDSRT. Please feel free to reach out through email or text.

Hello! My name is Caitlin Rittberger, and I am a first year student at Rapid City Regional's Medical Radiography Program. I grew up on a cattle ranch north of Newell, SD and graduated from Newell High School in 2012. I continued my education at South Dakota State University with different intentions, but then I decided to reroute my education where my heart was set on becoming a radiologic technologist. I then finished my degree at Black Hills State University with an A.S. in Health Science. I have previously worked as a scribe for a family physician, and continue working part-time as a server while going to school. In my spare time, I enjoy doing outdoor activities in the beautiful Black Hills, riding my horses, and traveling every chance I can get.

I am thankful to have received this spot as student delegate and excited to be able to represent South Dakota and other future radiologic technologists currently getting their education in this promising career. I am thrilled to meet you all in the near future and have the opportunity to network and learn more about our society as a student! See you all in April at SDSRT Conference!
